Mobile App Development USA

Coding Brains is a leading Mobile App Development service provider in India that works in the U.S. Day Time zone.

What is Mobile App Development?

Mobile application development is a set of processes by which a smartphone app is developed for mobiles. The mobile app development comprises software bundles, backend services as data access in the form of an API, quality, and testing the application on various target devices like [Android](#), [iOS](#), and [Windows](#) Mobile Phones.

Our professional team of App Developers understands the diverse business requirements of customers vary from startups, small business houses to large-cap companies from diverse industries. We design and develop custom applications that could help them to maintain a competitive advantage over rivals.

To provide a seamless experience to the customer, our expert team of professionals utilizes advanced tools and frameworks to design custom applications for Android, iPhone, iPad and Windows devices during a whole Mobile App Development process. From creating a strategy to app design to develop and deploy the mobile application, we strictly follow the guidelines to deliver top-ranking apps.

[iOS App Development](#)

While offering customized iOS Development Services to our valuable clients, we follow an agile approach of design and development if it's about to deliver robust iOS apps within a given timeframe. In other words, as a well- known IT Pioneer, we have a pool of experienced iOS professionals who are specialized in tailoring iOS Apps for iPhone and iPad.

As a leading iOS Development Company, Coding Brains offer solutions that consist of a whole App Development

life cycle whether it's about client consulting, creating product strategy or UI/UX Design.

Understanding the diverse requirement of industry verticals we customize iOS Mobile Applications for a complete range of iOS Smart devices from iPad to iPhone development. Additionally, we design applications with a focus on user experience and functional design.

Automation Applications	Tracking Solution	Time Tracking Apps	Asset Tracking Apps
With the help of iOS Apps, it becomes easy to automate tough procedures for increasing efficiency.	Our Tracking app is compatible with tablets as well as for all iOS devices and features employee attendance and reports.	iOS enabled Time Tracking Application helps you to eye on workflows, locations and employee work time. PROGRESSIVE WEB APP DEVELOPMENT (PWAs)

Our expert team of professionals designs secure loading web pages to ensure better performance, similar to native mobile apps. With extensive experience in Progressive Web App Development (PWAs) services, we create web applications that integrate unique features from push notification to data analysis into web applications. Apart from this, we combine tools and technologies to provide perfect user experiences on smart devices utilizing service workers or modern browser APIs.

Coding Brains has been a leading Progressive Web App Development (PWAs) company developing web applications consisting of fast-loading web pages.

Accessibility	Engagement	Conversion Rate	No Network Issue
As PWAs met with criteria, the chrome browser prompts the user to add the web application to his home screen.	PWAs have higher engagement in contrast with the native apps as they have a fast loading feature.	Because of the amazing user experience, it helps companies to improve conversion rates.	Progressive web apps provide great user experience in a glitch-free scenario to even in case of poor network.

Progressive web apps developed by our dedicated developers ensure better performance, similar to that of the native mobile application. With an objective to maximize engagement, Coding Brains develops web applications that run faster across the number of platforms. During the development phase, we integrate features like offline browsing, data analysis and easy distribution channels into web applications.
